

Enabling the Firefox browser to open links in PDF documents

If you use mozilla Firefox as your internet browser, you may have to change a setting in order to open the links in the newsletter. To make this setting change, follow the steps below:

1. With Firefox open, go to the menu bar at the top of your screen and click on the word “Firefox”.
2. Now click on “Preferences” or “Options” (depending on the version of Firefox you are using).

3. With Preferences or Options open, single click on “Applications”(see below screenshot).
4. Scroll down the “Content Types” to Portable Document Format (PDF) and single click with your mouse on that line in order to highlight the line. (see below screenshot)
5. Single click on the up/down arrow to the right of the “Action” portion of the Portable Document Format line and you will see the settings that are selectable. (see below screenshot)
6. Select “Use Preview (default)” or “Use Adobe Reader” (depending your version of Firefox).
7. Close the window and you should be able to now use the links in the PDF newsletter.
8. Email the webmaster if you experience any issues or problems.
